

Amerikam, Over 80 Successful Years of Business!

Amerikam, a Wyoming, Michigan-based precision machining manufacturing company, designs, manufactures, and develops flow control products for the plumbing, defense, transportation and medical industries. Continued investment in research and development, along with product and process improvements, is the foundation of Amerikam's strength in manufacturing. Amerikam has been recognized as World Class Manufacturer of the Year by the Grand Rapids Area Chamber of Commerce and Outstanding Manufacturer of the Year by the Wyoming Kentwood Area Chamber.

With the latest in technology which integrates process control, testing and machining, Amerikam provides the precision processing technologies necessary to meet today's evolving manufacturing landscape. Every machining application presents its own challenges, but the manufacturing objectives are the same to develop a machining process that improves part quality while reducing production time and cost.

Amerikam's capabilities include product development from concept to manufacturing the final products, which requires a strong, creative workforce. The Company's commitment to education and training is highlighted by the over 40-year relationship with Ferris State University. This collaboration and dedication between business, industry and education results in a job ready workforce. Our Ferris endowment scholarship ensures that future students have the opportunity to engineer a better world.

Amerikam gains the highest levels of customer satisfaction through a joint effort between our customers' applications and our support capabilities. Our team of engineers and technicians, in combination with extensive process knowledge and a multi-disciplinary experience base, provides unique abilities that distinguish us from our competition.

Amerikam's commitment to the environment has the added benefit of reducing material costs. Purchases are made from recycled materials, and approximately 75% of metals in the machining process go right back to the source to be reused immediately. The end-use metal products are also fully recyclable and valuable. Producing your components from brass, stainless steel and other metals that are 100% recyclable is good business for Amerikam, for you, and for our world.

Amerikam is also recognized as a company that gives freely of itself to the West Michigan community by contributing time and profits to support education and growth organizations such as the Grand Rapids Symphony, Junior Achievement, Juvenile Diabetes Research Foundation, United Way, Jason Kinzler Family First Foundation, Habitat for Humanity, and many more. Amerikam's dedication to veterans and their families goes beyond a philosophy. The company is proud of its full support of employees who serve—keeping them whole with their wages and providing strong support to their families while they are on military duty.

Amerikam is located at 1337 Judd Avenue S.W., Grand Rapids, MI 49509, and may be visited on the web at www.amerikam.com
